

MITHLAJ MT

MEAN STACK DEVELOPER

+91 8606893474 @ mithlajmatta@gmail.com malappuram, Kerala 23/01/2002

SUMMARY

Experienced Angular Developer with in-depth knowledge of Angular 15/16, TypeScript, JavaScript, Tailwind CSS, SCSS, Node.js, and Figma for UI/UX design. Skilled in API integration, Firebase hosting, and Git/GitHub for version control. Proficient in RxJS and Angular CLI, prioritizing efficient project development. Strong problem-solving, collaboration, and adaptability skills in dynamic environments. Dedicated to ongoing learning and innovation in Angular development.

EXPERIENCE

MEAN STACK DEVELOPER

LEVELX LLP 06/2023 - Present Calicut/Kerala

Experience in utilizing front-end frameworks such as Angular and Tailwind CSS, with a specialization in creating intuitive user interfaces and enhancing overall user experience.

- Utilized front-end frameworks such as Angular and Tailwind CSS
- Specialized in creating intuitive user interfaces and enhancing overall user experience

PROJECTS

WORKSYNC - HRMS TOOL

2024 - Present

Backend-git frontend-git

In my current role, I lead the development of "WorkSync," an HRMS tool crafted for seamless collaboration and heightened efficiency. Notably, it functions as a robust solution for individual companies and holds transformative potential, allowing simultaneous utilization by multiple organizations.

Key Features:

- Centralized attendance and task management.
- Timely event notifications.
- Inter-company collaboration and departmental chatting.
- Streamlined complaint registration and user-friendly leave requests.
- Comprehensive employee attendance and departmental management.
- Task, to-do list tracking, and notification management.
- Straightforward complaint processing and efficient workflows.
- Company-wide updates feed and in-company job postings.

Skills Acquired:

- Proficient project management for large-scale tool development.
- Effective collaboration and coordination within multi-functional teams.
- Strategic planning to optimize tool functionality and user experience.

Technologies Used:

- Twilio for communication integration.
- Nodemailer for efficient email notifications.
- AWS for scalable and reliable cloud infrastructure.
